DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. John J. Torrente, registration number 26,359 on 08 June 2005.

The application has been amended as follows:

As to claim 1, line 10, "said operation means" is amended to read – said operation buttons --.

As to claim 2, line 14, "said operation means" is amended to read – said operation buttons --.

As to claim 4, line 13, "said operation means" is amended to read – said operation buttons --.

Allowable Subject Matter

2. Claims 1-8 are allowed. The following is an examiner's statement of reasons for allowance: As to independent claims 1, 2 and 4, the prior art Campo and Kleinschmidt disclose a portable telephone with an integrated heads-up display where the display includes a prism mounted on the display portion to enlarge the image data but the

display portion is housed in an extendable arm or, as further described in cited reference Chigra, connected to the main body (and main body with buttons) of the mobile electronic apparatus. Consequently, the prior art made of record failed to teach a mobile type electronic apparatus comprising communication means wherein the display portion comprising enlargement *display means and operation buttons are provided on a common operation panel of a main body of the mobile type electronic apparatus* and the prism is mounted on the display portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chigira et al. (US 6,515,638) discloses an image display apparatus comprising a prism to enlarge the virtual image connected to a portable telephone main body where the main body also comprises operation buttons.

Note: Cone et al. (US 2001/0054988) teaches a portable communication device with virtual image display module as part of the main body but is pre-dated by the applicant's foreign priority.
